- Revenue was PLN 769.1m in H1 2015 (-10% YoY) and PLN 380.4m in Q2 2015 (-2% QoQ). The decline in revenues was driven mainly by a sequential decline in the number of services (RGUs) (-7% YoY, -1% QoQ), in particular in the regulated access fixed line telephony (WLR) in B2C, and the continued pricing pressure and relatively lower voice traffic volumes in B2B.
- *Adjusted EBITDA* was PLN 223.1m for H1 2015 (-14% YoY) and PLN 109.8m in Q2 2015 (-3% QoQ). Adjusted EBITDA margin was 29.0% for H1 2015 and 28.9% in Q2 2015.

Operating free cash flow, measured as Adjusted EBITDA less capital investment excluding integration related capex, Netia Lite project and capitalised interests, was PLN 120.4m for H1 2015 (-23% YoY) and PLN 52.6m in Q2 2015 (-23% QoQ).
- Netia's cash and short term deposits at June 30, 2015 totalled PLN 61.7m, with total debt at PLN 249.5m. Net debt therefore stood at PLN 187.8m at June 30, 2015 (down by PLN 177.6m YoY and up by 149.3m QoQ) and represented 0.38x Adjusted EBITDA for 2014 of PLN 493m.

#### Post balance sheet date events

Acquisition of TK Telekom Sp. z o.o. On May 8, 2015 Netia signed a preliminary agreement to acquire 100% of shares in TK Telekom Sp. z o.o. from the Polish railway, PKP Group. The transaction was finalised on July 21, 2015 for a total value of just below PLN 222m. The acquisition was financed partly from the available credit facility (in the amount of PLN 150m) and partly from Netia's own resources (in the amount of approximately PLN 72m). The transaction scaleS up Netia operations, extend Netia's own infrastructure footprint and will bring additional balance sheet flexibility to the Group.

Immediately after closing the deal Netia has begun a detailed analysis to determine the final shape of integrating TK Telekom into the Netia Group. Currently, there are intensive works ongoing with an aim to assess the full potential of cost savings, optimise capital investments and align accounting policies in the acquired company. More detailed plan will be presented by the end of 2015. The acquisition is expected to bring a visible impact on Netia Group's results, including synergies, during 2016. The transaction is in line with the Netia Group's strategy to play an active role in consolidation of the Polish telecommunications market.

Credit agreement. On July 9, 2015 Netia executed a credit agreement with mBank S.A. (Facility Agent and Security Agent) and DNB Bank Polska S.A. and DNB Bank ASA, under which the lenders agreed to extend to Netia a three year credit facility with a total amount of up to PLN 400m, designated for: (i) repayment of the Company's debt resulting from the previous credit agreement dated November 3, 2014 – up to the total amount of PLN 250m and (ii) investment related to the acquisition of shares of TK Telekom – up to the total amount of PLN 150m. Following a TK Telekom acquisition the Netia Group's financial standing remains very strong with a leverage at a convenient level below 1.0x of the 2014 Adjusted EBITDA at PLN 493m.

#### 3.2.1 TV and content services

*Netia's TV services* reached 152k at June 30, 2015 (+18% YoY, +5% QoQ), representing a sequential increase by 6.8k services.

Netia offers its customers TV services branded as 'Telewizja Osobista' (Personal Television). #### 3.2.2 Broadband services

*Broadband* services totalled 771k at June 30, 2015 (-7% YoY, -1% QoQ), representing a sequential decrease by 9.1k services. Netia is focusing on its own network and bundled services rather than regulated access or total services sold in order to defend gross margins. In H1 2015 the Company recorded growth in on-net broadband services while regulated access services (BSA, LLU) decreased. Of the total broadband customers served at June 30, 2015, 54% received service over Netia's own access infrastructure as compared to 49% at June 30, 2014.

In January 2015 Netia signed *a new co-operation agreement with P4 Sp. z o.o.*, an operator of the Play mobile network, which facilitates provisioning of a wider range of mobile services and multiplay packages to Netia customers. *Voice lines* totalled 1,275k at June 30, 2015 (-10% YoY, -2% QoQ), representing a sequential decrease by 19.6k services.

Due to competitive market conditions and focus on higher-value services on its own networks, Netia is concentrating on defending voice revenues and margins through retention activities as opposed to subscriber numbers. Moreover, Netia is steadily growing its base of relatively low cost VoIP customers, principally in the business segments. During Q2 2015 the customer base of VoIP customers in Netia's own network grew by 9k. Of the total voice customers served at June 30, 2015, 50% received service over Netia's own access infrastructure as compared to 46% at June 30, 2014.

*Revenue* totaled PLN 769.1m (-10% YoY). The B2C operating segment decreased by 15% or PLN 77.9m and the B2B segment by 3% or PLN 9.5m. The decline in revenues was driven by a 7% YoY decline in services provided (RGUs), which continued to be concentrated in the B2C (Home) sub-segment and in fixed voice services and lower margin WLR services in particular and a visible pricing pressure combined with lower traffic volumes in voice services in the B2B segment. The proportion of RGUs delivered on-network has increased from 49% to 53% in the twelve months to June 30, 2015.

*Telecommunications revenue* was PLN 767.7m (-10% YoY). Revenues from interconnect and carrier services combined were up by 3% or PLN 2.7m to PLN 87.1m. Direct voice revenue decreased by 20% and PLN 70.5m to PLN 281.4m, driven by a decrease in the voice subscriber base and the drop in the number of WLR services in particular and a continued on-net ARPU decrease. Indirect voice services (CPS) revenue decreased by 32% or PLN 2.2m as a result of decreasing customer numbers and falling ARPUs.

*Cost of sales* was PLN 547.3m (-6% YoY) and represented 71% of total revenue as compared to 68% in H1 2014. A decrease was recorded in majority of cost categories, driven mainly by lower cost of network operations and maintenance on fewer off-net RGUs. Moreover, salaries and benefits related to cost of sales decreased by 22% or PLN 3.6m following the headcount restructuring (the Netia Lite program). 	Definitions
Active headcount	<ul> <li>full-time employment equivalent with regard to employees who are not during maternity leaves, non-paid leaves nor long-term sick leaves (above 33 days during calendar year), who are not at military service or who were relieved from the obligation to perform work</li> </ul>
Backbone	• a telecommunications network designed to carry the telecommunications traffic between the main junctions of the network;
Bitstream access	<ul> <li>a type of regulatory broadband access enabling provision of broadband service by an altnet to customers connected by a copper line owned by the incumbent. The altnet connects to the incumbent's data network and may only offer services identical to those of the incumbent, paying it on a retail minus basis for use of its network.</li> </ul>
Broadband SAC	<ul> <li>a cost per unit related to the acquisition of new customers through broadband access (i.e., Bitstream, LLU, WiMAX, xDSL), including a one- time payment to the incumbent, sales commissions, postal services and the cost of modems sold;</li> </ul>
Broadband ARPU	<ul> <li>average monthly revenue per broadband port during the period; Broadband ARPU is obtained by dividing the amount of monthly revenues from data services related to provisioning fixed Internet access by the average number of broadband ports, in each case for the referenced three-month period; Where significant promotional discounts are given at the beginning of contracts, revenues are averaged over the life of the contract.</li> </ul>
Broadband port	<ul> <li>a broadband port which is active at the end of a given period;</li> </ul>
B2B (Business to Business)	<ul> <li>Netia's business unit responsible for all operations to the business customers and one of two main reporting segments, including B2B (Business) and B2B (Carrier) sub-segments.</li> </ul>
B2C (Business to Consumer)	<ul> <li>Netia's business unit responsible for all operations to the residential customers and one of two main reporting segments, including B2C (Home) and B2C (SOHO) sub-segments.</li> </ul>
Cash	<ul> <li>cash and cash equivalents at the end of period;</li> </ul>
Cost of network operations and maintenance	<ul> <li>cost of rentals of lines and telecommunications equipment, as well as maintenance, services and related expenses necessary to operate our network;</li> </ul>
Data revenues	<ul> <li>revenues from provisioning Frame Relay (including IP VPN-virtual private network services), lease of lines (including leased lines for carriers), Internet fixed-access services (provided, among others, through bitsteam and WiMAX types of access) and IP Transit;</li> </ul>
Direct voice revenues	<ul> <li>telecommunications revenues from voice services offered by Netia to its subscribers (through various types of access, including, among others, WiMAX). Direct voice services include the following traffic fractions: local calls, domestic long-distance (DLD) calls, international long distance (ILD) calls, fixed-to-mobile calls and other services (incl. Internet dial-in, emergency calls and 0-80x/0-70x -type calls originated by Netia's subscribers);</li> </ul>
DSLAM	• technical infrastructure that splits data from voice traffic over a copper line and is deployed in the local network of a telecommunications operator to provide ADSL services to customers connected to a given local network node.

EBITDA / Adjusted EBITDA	• to supplement the reporting of our consolidated financial information under IFRS, we will continue to present certain financial measures, including EBITDA. We define EBITDA as profit/(loss) as measured by IFRS, adjusted for depreciation and amortization, financial income and expense and income taxes. EBITDA has been further adjusted for non-cash impairment charges for non-current assets, one-off restructuring expenses related to the cost reduction program, M&A expenses, New Netia integration expenses, B2B/B2C split costs (Project N <sup>2</sup> ), impairment charge on market valuation of Netia's investment property and a decrease in provision for universal service obligation payment and is therefore defined as Adjusted EBITDA. We believe EBITDA and related measures of cash flow from operating activities serve as useful supplementary financial indicators in measuring the operating performance of telecommunication companies. EBITDA is not an IFRS measure and should not be considered as an alternative to IFRS measures of profit/(loss) or as an indicator of operating performance or as a measure of cash flows from operations under IFRS or as an indicator of liquidity. The presentation of EBITDA, however, enables investors to focus on period-over-period operating performance, without the impact of non-operational or non-recurring items. It is also among the primary indicators we use in planning and operating the business. You should note that EBITDA, accordingly, may vary significantly from company to company, and by itself provides no grounds for comparison with other companies;
