

NETIA GROUP
COMMENT ON THE FINANCIAL REPORT
FOR THE FIRST QUARTER OF 2009

(All amounts in thousands, except as otherwise stated)

This comment presents the financial results of Netia S.A. ("Netia", the "Company", the "Issuer") and the consolidated financial results for the Netia S.A. Group ("Netia Group").

1. The Netia Group's structure

The interim condensed consolidated financial statements as at and for the three-month period ended March 31, 2009 include the financial statements of the Company and the following subsidiaries:

Netia Spółka Akcyjna UMTS Spółka komandytowo – akcyjna
Netia UMTS Sp. z o.o.
In2Loop Polska Sp. z o.o.
InterNetia Holdings Sp. z o.o. Group (previously operating under the name InterNetia Sp. z o.o.)

The financial statements of the InterNetia Holdings Sp. z o.o. Group include the financial statements of InterNetia Holdings Sp. z o.o. and its subsidiaries:

- Interbit Sp. z o.o.
- Netis Sp. z o.o. and its wholly-owned subsidiary Ticom Sp. z o.o.
- Przedsiębiorstwo Informatyczne Punkt Sp. z o.o.
- Connect Systemy Komputerowe Sp. z o.o. and its wholly-owned subsidiaries Netster Sp. z o.o. and Cybertech Sp. z o.o.
- Lanet Sp. z o.o. and its wholly-owned subsidiaries Seal-Net Sp. z o.o. and Easy Com Sp. z o.o.
- UNI-Net Sp. z o.o.
- Internetia Sp. z o.o. (previously operating under the name Air Bites Polska Sp. z o.o.)

2. Changes within the Netia Group's structure

Registration of a subsidiary (not in thousand)

On January 30, 2009, the Company subsidiary, Netia UMTS Sp. z o.o. ("Netia UMTS"), was registered in National Court register. Netia acquired 100 Netia UMTS' shares (with a par value of PLN 50 per share) constituting 100% of Netia UMTS' share capital and giving Netia 100% of the voting power at Netia UMTS' general meeting of shareholders. Netia financed the transaction from its own capital. The book value of Netia UMTS in Netia's accounts amounts to PLN 5,000. The acquisition will be treated as a long-term investment.

Mergers with subsidiaries

On February 27, 2009 Netia merged with its wholly-owned subsidiary Tele2 Polska Sp. z o.o. ("Tele2 Polska"). The merger was carried out through the transfer of the acquired company's assets to Netia (merger by acquisition) without any increase in Netia's share capital and without any share exchanges.

Transfer of shares' ownership (not in thousands)

On February 27, 2009, the Internetia Holdings Sp. z o.o. ("Internetia"), Netia's subsidiary, transferred the ownership of the below mentioned shares in its subsidiaries:

- 2,039 shares in the share capital of Easy Com Sp. z o.o. ("Easy Com"), with the total nominal value of PLN 1,019,500, to another Netia's subsidiary operating under the business name Lanet Sp. z o.o. ("Lanet"). These shares represent 100% of the share capital and confer the right to 100% of the votes at Easy Com's meeting of shareholders. The transfer of the above referred shares was made in execution of the agreement concluded by Internetia and Lanet on February 27, 2009. The shares represent an in-kind contribution in exchange for which Internetia acquired 400 newly issued shares in Lanet, with the nominal value of PLN 500 and at the issue price of PLN 21,182.20 each, i.e., for a total price of PLN 8,472,880.
- 200 shares in the share capital of Cybertech Sp. z o.o. ("Cybertech"), with the total nominal value of PLN 50,000, to another Netia's subsidiary operating under the business name Connect Systemy Komputerowe Sp. z o.o. ("Connect"). These shares represent 100% of the share capital and confer the right to 100% of the votes at Cybertech's meeting of shareholders. The transfer of the above referred shares was made in execution of the agreement concluded by Internetia and Connect on February 27, 2009. The shares represent an in-kind contribution in exchange for which Internetia acquired 2,000 newly issued shares in Connect, with the nominal value of PLN 50 and at the issue price of PLN 2,079 each, i.e., for a total price of PLN 4,158,000.

NETIA GROUP
COMMENT ON THE FINANCIAL REPORT
FOR THE FIRST QUARTER OF 2009

(All amounts in thousands, except as otherwise stated)

3. Shareholders holding at least 5% of the votes at the General Shareholders' Meeting of Netia as at the date of filing this report and changes in the ownership structure in the period since the submission of the previous quarterly report (not in thousands)

Based on the information presented to the Company by the shareholders, as at the date filing of this report, significant blocks of the Company's shares were held by the following entities (the interest and the number of votes are calculated on the basis of the number of shares constituting the Company's share capital as at May 6, 2009):

Third Avenue Management LLC

Third Avenue Management LLC held 93,720,763 shares constituting 24.1% of the Company's share capital, inclusive of the shareholding of Third Avenue International Value Fund described below. The number of the Company's shares held by Third Avenue Management LLC has not changed since the submission of the previous quarterly report.

Third Avenue International Value Fund

Third Avenue International Value Fund held 19,594,034 of the Company's shares constituting 5.0% of the Company's share capital and representing 5.0% of the total number of votes at the General Shareholders' Meeting of the Company. The number of the Company's shares held by the subsidiaries of Third Avenue International Value Fund has not changed since the submission of the previous quarterly report.

Subsidiaries of SISU Capital Limited

The subsidiaries of SISU Capital Limited held a total of 39,043,006 of the Company's shares constituting 10.0% of its share capital and carrying 10.0% of the total number of votes at the General Shareholders' Meeting of the Company. The number of the Company's shares held by the subsidiaries of SISU Capital Limited has not changed since the submission of the previous quarterly report.

ING Otwarty Fundusz Emerytalny

In the period from the submission of the previous quarterly report ING Otwarty Fundusz Emerytalny increased their share in the Company's share capital and exceeded the threshold of 5% of the total number of votes at the General Shareholders' Meeting of the Company. ING Otwarty Fundusz Emerytalny held a total of 36,950,861 of the Company's shares constituting 9,5% of its share capital and representing 9,5% of the total number of votes at the General Shareholders' Meeting of the Company.

Pioneer Pekao Investment Management SA

In the period from the submission of the previous quarterly report the subsidiaries of Pioneer Pekao Investment Management SA increased their share in the Company's share capital and exceeded the threshold of 5% of the total number of votes at the General Shareholders' Meeting of the Company. All Pioneer Pekao Investment Management SA's clients jointly held a total of 34,364,998 of the Company's shares constituting 8,8% of its share capital and representing 8,8% of the total number of votes at the General Shareholders' Meeting of the Company.

Based on the information presented to the Company as at the date of submission of the previous quarterly report Novator Telecom Poland II S.a.r.l. held 121,784,294 shares constituting 31.3% of the Company's share capital and representing 31.28% of the total number of votes at the General Shareholders' Meeting of the Company. During the first quarter of 2009 Novator Telecom Poland II S.a.r.l. sold all of its holdings of Netia shares.

4. Changes in shares and share options held by members of the Company's Management Board and Supervisory Board (not in thousands)

Between the adoption of the employee share option scheme (the "Plan") on April 10, 2003 and March 31, 2009, the Supervisory Board approved and issued a total number of 83,364,970 options to members of the Management Board and to Netia's key employees. Out of the total number of approved options 51,117,623 were outstanding as at March 31, 2009. The options are exercisable until December 20, 2012. The strike price of the approved outstanding options, depending on the agreement, ranges between PLN 3.50 and PLN 8.25 per share.

During the first quarter of 2009 the following changes took place in the number of options granted under the Plan:

Three-month period ended March 31, 2009

At the beginning of the period	50,268,123
Granted.....	1,400,500
Forfeited / expired.....	(551,000)
At the end of the period	<u>51,117,623</u>

NETIA GROUP
COMMENT ON THE FINANCIAL REPORT
FOR THE FIRST QUARTER OF 2009

(All amounts in thousands, except as otherwise stated)

There were no changes in the number of options granted to members of the Management Board during the first quarter of 2009 and as at the date of filing this report. Options held by members of the Company's Management Board are presented below:

- Mr Miroslaw Godlewski held 13,334,000 options,
- Mr Jonathan Eastick held 10,938,314 options,
- Mr Piotr Nesterowicz held 6,666,500 options,
- Mr Tom Ruhan held 5,666,500 options.

In the first quarter of 2009 Mr. Piotr Czapski, a member of the Company's Supervisory Board, held 1,000,000 options. Due to his resignation from his position, effective April 9, 2009, as of at the date of filing this report these options are no longer treated as options held by members of the Supervisory Board.

During the first quarter of 2009 and as at the date of filing this report there were no changes in the number of Netia's shares held by members of the Company's Management Board. Netia's shares held by members of the Company's Management Board are presented below:

- Mr Jonathan Eastick held 25,000 shares,
- Mr Tom Ruhan held 253,593 shares.

Changes in the number of Netia's shares held by members of the Company's Supervisory Board are presented below:

<i>Three-month period ended March 31, 2009</i>	Tadeusz Radzimiński	Raimondo Eggink	Constantine Gonticas	Bruce McInroy	Total
At the beginning of the period	2,000	20,000	143,000	150,000	315,000
Purchase of Netia's shares	4,000	-	-	-	4,000
At the end of the period.....	<u>6,000</u>	<u>20,000</u>	<u>143,000</u>	<u>150,000</u>	<u>319,000</u>

Due to the resignation of Mr. Constantine Gonticas and Mr. Bruce McInroy from their positions, effective April 9, 2009, as of at the date of filing this report their shares are no longer treated as shares held by members of the Supervisory Board.

Moreover, due to the changes of Rules of Remunerating the Supervisory Board Members approved by the Ordinary General Meeting on 9 April 2009, each Independent Supervisory Board Member (as defined in the Company's Statute) elected by the General Meeting, who remains in office after these Rules come into force received a one time grant of 50,000 Restricted Stock Units corresponding to one ordinary share in the Company having the value equal to the market price of Company shares.

5. Legal proceedings

Jupiter

Jupiter Narodowy Fundusz Inwestycyjny S.A. ("Jupiter") has sued the Company for payment of PLN 2,084 on alleging improper performance of the Share and Bonds Purchase Agreement dated May 22, 2006 (the "Agreement") relating to the Company's purchase of Pro Futuro S.A. ("Pro Futuro").

Having identified unrecorded liabilities the Company applied the price reduction mechanism provided for in the Agreement and requested the escrow agent to reimburse part of the price paid for the Pro Futuro shares. The escrow agent reimbursed the Company in the amount of PLN 1,940 on account of the breach of the Agreement. The existence of unrecorded liabilities was confirmed by an independent auditor.

Since Jupiter did not agree with the price reduction, it filed a suit against the Company on September 7, 2007. The amount claimed by Jupiter comprises the amount of the reduced price, increased by statutory interest. On October 30, 2007, the Company responded to the suit, requesting dismissal of the claim on the grounds that it was entirely unfounded. The matter is still pending.

Management, having obtained legal advice, does not believe resolution of the matter described above will have a material adverse effect on the Netia Group's financial condition and no liability has been recorded for the claim.

TP SA

As a result of Telekomunikacja Polska S.A. ("TP SA") failing to meet certain obligations under the bitstream access agreement, in 2007 and 2008 the Company demanded payment from TP SA for contractual penalties totaling PLN 22,425, following the expiration of an initial grace period. Netia's management intends to use all legal means to enforce the penalties and will recognize income when TP SA either pays or settles the liability in a manner acceptable to Netia. After the Company's demand for TP SA to pay contractual penalties delivered in 2007, Netia filed a claim in court against TP SA for payment of PLN 19,542 of penalties. Despite the fact that the Management Board is convinced of the legitimacy of the claim the Management Board cannot ensure that the Court will decide fully in accordance with the claim.

Prior to its acquisition by Netia, Tele2 Polska has made several significant damages claims against TP SA, a number of which are the subject of legal proceedings at the present time. Netia's Management is in the process of familiarizing itself with the details of these claims and has not reached a conclusion as to the probability of executing these claims against TP SA, in whole or in part, as at the date of this report and therefore no contingent asset in relation to these claims has been recognized as at September 30, 2008.

NETIA GROUP
COMMENT ON THE FINANCIAL REPORT
FOR THE FIRST QUARTER OF 2009

(All amounts in thousands, except as otherwise stated)

6. Factors which may have an impact on the result of the Netia Group

Risk of changes to the Netia Group's strategy

On April 18, 2007 the Company announced the main assumptions of its new operational strategy. Financial guidance regarding this strategy was last updated on April 6, 2009 to take account of the material impact of the Netia's strategic cost reduction project. No assurance can be given as to whether new strategic initiatives included in the new strategy, will be successful, and if not, whether they may adversely affect the operating activity of the Netia Group, its financial standing or its overall performance.

Funding risk

Although Netia has maintained a significant cash surplus over the past few years and the Company's core activities remain cash generative, the Company changed its strategy in 2007 to one which requires significant investments and start-up losses in order to develop new sources of revenue and to expand Netia's market share. In 2008 Netia received EUR 131,795 for its stake in P4 and paid EUR 31,385 for the acquisition of Tele2 Polska. Furthermore, the Company has raised funding from medium-term senior debt of PLN 375.000, which has not yet needed to be drawn. Whilst these amounts are currently expected to be sufficient for Netia to reach cash flow break-even, no assurance can be given that Netia's plans will be reached as expected and, if performance is significantly below expectations, the Company may need to raise additional financing from financial institutions and or from its shareholders. We cannot guarantee that such funding would be available on acceptable market conditions or at all and, if this proved to be the case, Netia would have to significantly modify its development plans.

Foreign currency risk

Approximately 65% of Netia's typical annual capital investment programme and up to 10% of typical operating expenses are either invoiced in foreign currencies or are invoiced in Polish Zloty based on price lists expressed in foreign currencies. Netia operates a Risk Management Committee that decides, from time to time, to hedge these exposures to foreign currency risks and if so, the proportion of the exposure to be hedged. Whilst Netia's hedging activities are designed always to reduce Netia's exposure to earnings volatility through changes in exchange rates (i.e. Netia does not speculate), we can give no assurance that entering into hedging transactions will result in higher earnings or cash-flows that if we had not hedged the Company's currency exposures.

Risk of changes in the shareholder structure, which may influence business activity

Currently, Netia is not controlled by any strategic investors, and its shares are held by a large number of shareholders. Novator Telecom Poland II S.a.r.l. („Novator”), previously the largest single shareholder of Netia (31.3% of the Company's share capital), sold all of its holdings of Netia shares during the first quarter of 2009. In the same period ING Otwarty Fundusz Emerytalny and clients of Pioneer Pekao Investment Management SA increased their share in the Company's share capital and according to the information provided to the Company hold 36,950,861 and 34,364,998 shares constituting 9.5% and 8.8% of the Company's share capital and representing 9.5% and 8.8% of the total number of votes at the General Shareholders' Meeting of the Company, respectively. Moreover Third Avenue Management LLC (“Third Avenue”) holds 93,720,763 shares representing 24.1% of the Company's share capital and 24.1% of the aggregate number of votes at the Company's General Shareholders' Meeting. The subsidiaries of SISU Capital Limited hold 39,043,006 shares representing 10.0% of the Company's share capital and 10.0% of the aggregate number of votes at the Company's General Shareholders' Meeting. Neither Netia's corporate documents nor the provisions of Polish law provide for any serious restrictions to changes in control over the Issuer in the event of third parties acquiring a considerable number of shares. Thus, such changes of control may materially affect the composition of the Company's Supervisory Board and the Management Board and, in turn, the strategy and business activity of the Netia Group. Due to the above, the Issuer cannot guarantee that any adopted strategy of the Netia Group will be pursued in accordance with its initial objectives.

Risk connected with the impact of potential future takeovers and acquisitions of large-scale businesses

Revenues and financial performance of the Netia Group may materially be affected by takeovers of and mergers with other entities that operate large scale telecommunications businesses. Upon the Company's takeover of another entity, the process of fully integrating this entity may carry high risks, e.g. employment termination by key employees, the loss of a certain segment of its customers or high costs of the entire integration process.

The fragmented market of alternative operators rendering wireline telephone services may result in increasing consolidation within the Polish market. The Company shall evaluate potential takeovers and acquisitions whenever such possibilities arise. The performance of such transactions requires the special involvement of the Company's high-ranking managers and may entail high costs connected with the identification and evaluation of the candidates for takeover, the negotiating of agreements and integration of the entities acquired. The Netia Group may require additional funding in order to conduct such transactions.

The benefits from potential takeovers will depend mostly on the extent to which the Netia Group is able to integrate the acquired entities into its structures. Future company acquisitions may entail acquiring existing liabilities and the risk of undisclosed liabilities. The Netia Group cannot guarantee that beneficial takeover possibilities will arise in the future, nor, if such possibilities arise, that they will result in the successful integration of the acquired entities with the Netia Group. Failure to integrate the acquired entities into the structures of the Netia Group and / or the failure to generate the expected operating and strategic synergies may adversely affect the operations and financial standing of the Netia Group.

NETIA GROUP
COMMENT ON THE FINANCIAL REPORT
FOR THE FIRST QUARTER OF 2009

(All amounts in thousands, except as otherwise stated)

Risks relating to the acquisition, integration and development of Ethernet network operators

An important element of Netia's strategy to expand its broadband subscriber base is the acquisition of Ethernet network operators. Our plans require that these companies, which typically have no more than 5,000 customers at the time of acquisition, are fully integrated into Netia's core operations. We aim to continue to grow the subscriber bases connected to the networks that we acquire and to upsell their customers voice services in addition to the internet access that they currently purchase. We cannot provide any assurance that we will be successful in implementing this strategy in whole or in part in any or all of the Ethernet networks that we have or will acquire. Costs of integration may exceed our plans or we may discover undisclosed liabilities post acquisition. Customers may prove reluctant to switch to services provided by Netia directly or unwilling to switch to Netia voice services from their current providers. Moreover the price of such Ethernet networks may increase to the point that further acquisitions are uneconomic, making it more difficult for Netia to reach its subscriber growth objectives. Failure to fully implement our strategy in regard to Ethernet network operators may adversely affect the operations and financial standing of the Netia Group.

Technological risk

The telecommunications sector is an area witnessing dynamic technological changes. In designing and expanding its networks, the Netia Group uses the latest technical solutions. However, it is not possible to predict how the Netia Group's operations may be affected by technological advances in the field of fixed-line telephony, wireless transmission, voice transmission protocol via the Internet or cable television telephony. In particular, the business activities of the Netia Group may be affected by the tendency to provide telecom services via wireless or portable platforms, with wireless broadband access and third generation mobile cellular telephone systems equipped with IP. Due to the difficulties in predicting future technological developments, market potential and regulatory environment, Netia may sometimes invest in technologies that ultimately do not deliver the expected returns. When such a situation occurs, it can have a significant negative impact on our results and financial condition.

Risk of employment termination by key executives and difficulties related to the recruitment of new, competent executives

The activity of the Netia Group is dependent on the quality of the work of its staff and employees in executive positions. The Management Board cannot guarantee that the possible termination of employment by some of its key executives will not adversely affect the financial standing and performance of the Netia Group, which, should some of its executives terminate their employment, may then lack executives with sufficient knowledge and experience in the field of management and operating activity. Changes in composition at the Company's executive levels may result in disruptions in the Netia Group's business activity.

Risk resulting from changes in the Telecommunications Law

The Telecommunications Law transposed the so-called "set of directives 2002" and entered into force on September 3, 2004, with the exception of several provisions, which entered into force on January 1, 2005.

Pursuant to the Telecommunications Law, each public telecommunications network operator is required to conduct negotiations concerning interconnection agreements upon another telecom operator's request. However, the President of the UKE is required to resolve any disputes between the parties to the negotiations by way of an administrative decision, which shall replace the relevant agreement only if one of the negotiating parties is a public telecommunications network operator required to provide the interconnection.

According to the act *on the amendment of Telecommunications Law act and other acts*, passed by the Polish Sejm on April 24, 2009, the extent of an obligation to negotiate agreements on telecommunications access, imposed on non-SMP operators, has been limited to cover only the obligation to negotiate agreements on the interconnection of networks. A significant part of provisions of the above-mentioned act will enter into force within thirty days following the publication of the act in the Official Journal. The amendment introduces new obligations for telecommunications operators, concerning, in particular, telecommunications access, the terms and conditions regarding entering into and the modification of retail agreements (i.e. agreements with clients), protection of subscribers, number portability, data retention, as well as national defence, security and public safety and order obligations. The act specifies also the competences of President of UKE concerning the methods of verification of charges, proposed by SMP entrepreneurs for wholesale services provided by such an entrepreneur; the act introduces also the guarantees concerning the independence of the Regulator (amendment required by relevant EU legislation; according to the act, the prerequisites for the recall of the Regulator are limited to extraordinary circumstances. The act ensures also the durability of the term of office of the President of UKE). The entry into force of the provisions of the act, specifically with respect to the increased protection for subscribers and new duties regarding national defence and security, public security and the safeguard of the public order, may increase the operational costs of the Group Companies.

The Minister of Infrastructure is working on a further amendment to the Telecommunications Law. The Minister of Infrastructure received a draft prepared by UKE of the act „for the support of the development of services and networks for broadband telecommunications“. According to the guidelines for the law published by the President of UKE, one of the goals of the drafted act is to improve the investment process in telecommunications infrastructure. The draft contemplates a temporary release of the dominant operator, as a result of the UKE's decision from the obligation to provide other operators with conditions not worse than those applied inside its own enterprise or to affiliates, the said conditions being the conditions for the access to fibre, used for the provision of broadband data transmission, if the construction of such lines will start before March 31, 2009. This release can be provided if this will not worsen the conditions for an equal and effective competition in the performance of telecommunications networks and it will provide users with maximum benefits as to the diversity, price, and quality of telecommunications services. The draft contemplates application of these rules to the infrastructure for the construction of which started before March 31, 2009 if after this date it will or it was modified that allow to materially increase its transmission capabilities, if the performance of these services will be performed using the fibre leading to the end point at the subscriber of a capacity specified in the decision, the construction of which was started before March 31, 2009.

NETIA GROUP
COMMENT ON THE FINANCIAL REPORT
FOR THE FIRST QUARTER OF 2009

(All amounts in thousands, except as otherwise stated)

However, at this stage it is difficult to determine whether and when new regulations will be introduced.

Risks resulting from the obligation to provide universal services

The Telecommunications Law states that the obligation to provide universal services shall rest with the operator selected pursuant to a decision of the President of the UKE issued after a tender procedure. The President of the UKE issued a decision assigning TP SA as the operator required to provide universal services until May 8, 2011. Telecommunications providers whose revenues from telecom activities exceed PLN 4,000 have to co-finance the funding of this obligation. The share in the funding that a telecommunications provider will be required to provide shall also be established by a decision of the President of the UKE; however, it may not exceed 1% of the telecommunications provider's revenues in the given calendar year. The amount of the share in the funding of the universal service shall constitute a deductible cost, as defined by the Act on Corporate Income Tax. At the present stage one may not guarantee that the Netia Group will not be required to co-finance the funding of universal services.

TP SA applied to the President of the UKE for a subsidy towards the incurred costs of the universal service provision. The application pertains to the subsidy towards the costs for the period from May 8, 2006 to December 31, 2006 and for the year 2007. The President of the UKE refused to subsidize the costs of services provided by TP SA that form a part of the universal service in 2006. Having considered TP SA's claim, the court reversed decision of the President of the UKE. The President of the UKE and KIGEIT filed cassation appeals (*skarga kasacyjna*) with the Supreme Court against the unfavourable decision rendered by the court. The Management Board is unable to assure that the decision of the court will be repealed. The proceedings regarding TP SA's application for a subsidy towards the costs incurred in 2007 have not been closed.

Risks related to holding a position of SMP

The President of the UKE issued the decision, whereby it has appointed Netia as a telecommunications operator holding significant market power in the market for the call termination in its fixed public telephone network, in the area of the network where the termination is executed. At the same time, UKE imposed regulatory obligations that relate to:

- providing access to the network (including the use of network elements and associated facilities to the extent they are used to provide call termination services in the fixed public telephone network of Netia),
- non-discrimination (obligation not to discriminate between telecommunications operators with regard to telecommunications access to the call termination services in its fixed public telecommunications network, in particular to offer the same conditions in comparable circumstances, as well as to offer the services and to provide the information on the conditions not less favorable than used within own enterprise or in relations with affiliates);
- transparency (comprising the publication of the information in matters concerning provision of telecommunications access with regard to the provision of call termination services in the fixed public telecommunications network of Netia S.A., on technical specifications of networks and telecommunications equipment, network characteristics, terms and conditions of the services and of the use of networks, as well as on the fees).

In the performance of the obligation imposed on Netia in the above mentioned decision of the President of the UKE, the Company published information on the conditions of telecommunications access with regard to call termination services in the fixed public telephone network of Netia by posting them on the internet site of Netia S.A., at: http://www.netia.pl/informacje_dla_biznesu,42,921.html. The published document, hereinafter the "Netia IC Offer" contains information as required in the Decision of the President of the UKE, necessary for the preparation by the interested entrepreneurs of an application pertaining to the provision of telecommunications access with regard to call termination services in the fixed public telephone network of Netia.

The Court dismissed Netia's appeal against the Decision of the President of the UKE. Following the analysis of reasons of the above-mentioned decision of the Court, the Management Board will decide upon filing an appeal against it. Nevertheless the Management Board cannot assure that the above-mentioned judgment will be overruled in case the appeal is filed.

No assurance can be given as to whether Netia will not be obliged to perform some other duties set out in the Telecommunications Law imposed on a telecommunications operator holding significant market power in the market with respect to call termination services in the fixed public telephone network.

Dependence of the Company on TP SA due to telecommunication access services

Risks related to amendments to reference offers

TP SA is an operator obliged by virtue of the decision of the President of the UKE to prepare and present for approval draft offers on the telecommunications access that specify frame terms and conditions of contracts on telecommunications access to the network of TP SA for particular wholesale services.

Frame interconnection offer

The President of the UKE approved the "reference offer of TP SA on the telecommunications access with regard to call initiation, call termination, and wholesale network access". The decision was made immediately binding and enforceable. After scrutinizing the motion of TP SA for reconsideration of the case, the President of the UKE issued a decision amending the content of the approved frame offer. The amendments are of an organizational nature. In particular, the President of the UKE did not approve TP SA's request to change fees for services covered in the offer. The Management Board cannot assure that the resulting court proceedings will not result in the UKE's decision being amended or annulled.

**NETIA GROUP
COMMENT ON THE FINANCIAL REPORT
FOR THE FIRST QUARTER OF 2009**

(All amounts in thousands, except as otherwise stated)

Frame interconnection offer with regard to broadband access service ("BSA" or "Bitstream")

The President of the UKE approved "the reference offer of TP SA of the terms of telecommunications access with regard to broadband access service, including the broadband data transmission", which modified the terms of the broadband access that were agreed in the contract between Netia and TP SA. The decision approving TP SA's offer was made immediately binding and enforceable. After scrutinizing motion of TP SA and KIGEIT for reconsideration of the case the President of the UKE issued a decision amending the content of the approved frame offer. The amendments are of organizational nature. In particular, UKE did not approve TP SA's request to change fees for services covered in the offer. The Management Board cannot assure that the resulting court proceedings will not result in the UKE's decision being amended or annulled.

Due to the possibility that TP SA's reference offers, based on which the companies from the Netia Group concluded a contract for telecommunications access with TP SA, and subsequent decisions of the President of UKE replaced or amended the contract, may be withdrawn or new reference offers may be approved by President of the UKE, the Management Board cannot assure that the terms on which Netia uses access to the network of TP SA will remain unchanged in the future.

Risks related to a threat to the stability of the decisions on telecommunication access services

The terms and conditions under which the companies from the Netia Group use the services regarding telecommunication access to the network of TP SA with respect to particular wholesale services, which in a significant part arise from decisions of the President of the UKE. These decisions amend or replace contracts with TP SA on telecommunications access.

Interconnection

The rendering of telecommunications services by the Netia Group is dependent on the possibility of accessing the telephony network of TP SA. Except for some cases, calls initiated in Netia's network ending outside this network, including the majority of international and domestic long distance calls by subscribers of the Netia Group companies, are - due to technical reasons - executed via the network of TP SA. According to the provisions of the Telecommunications Law TP SA is required to connect companies such as Netia to its network.

In the past Netia has had many disputes with TP SA over interconnection, in particular in relation to the interconnection agreements of its former subsidiary El-Net (now merged with Netia SA). In order to avoid further disputes and to prevent conflict escalation, in December 2006 Netia concluded an agreement with TP SA on closing all disputed issues. Finally, on June 30, 2007 Netia and TP SA concluded contracts related to interconnection that thoroughly regulate the cooperation between operators.

At the request of Netia the President of the UKE issued a decision to modify the contract for interconnection with regard to the amount of a flat interconnection fee, applied for the settlement of the traffic, as specified in the decision, directed to flat rate interconnection points of Netia and TP SA. TP SA appealed from the aforementioned decision of the President of the UKE to the court. The Management Board cannot assure that this decision will not be reversed or annulled.

Wholesale network access service of TP SA (WLR)

SOKiK reversed the decision of the President of UKE (nevertheless, SOKiK did not suspend the enforcement of the decision in subject), specifying the rules of using by Premium Internet, whose rights and obligations were assumed by Tele2 Polska as a result of the merger of companies effective as of December 31, 2008 (and subsequently, the above-mentioned rights and obligations were assumed by Netia on February 27, 2009), the wholesale network access service of TP SA. On May 6, 2009, the Court of Appeal reversed the judgment of SOKiK and ordered a de novo trial to be conducted by the court of first instance. Despite the fact Management Board is convinced that the objections, raised by TP SA are ungrounded, the Management Board can not assure that, following reconsideration of the case, SOKiK will dismiss the appeal motioned by TP SA.

In August 2008 the President of the UKE issued decisions refusing to change the fees for the provision of WLR service in line with the motion of TP SA. TP SA appealed to the SOKiK against the decision issued to Premium Internet, whose rights and obligations were assumed by Tele2 Polska as a result of a merger on December 31, 2008 (and subsequently, the above-mentioned rights and obligations were assumed by Netia). Despite being of the opinion that the decision of the President of UKE is correct, the Management Board cannot assure that SOKiK will not accept claims raised by TP SA in the appeal.

The President of the UKE has issued to Netia SA a decision allowing wholesale network access service of TP SA. On the basis of this decision, prior to the merger of Premium Internet and Tele2 Polska, Netia filed to TP SA a binding statement on the use of WLR services on the terms that follow from the Decision on WLR Lines of Tele2 Polska, with the consent of this company. As a result of this statement Netia SA took over the provision of WLR services on WLR Lines of Tele2 Polska.

TP SA appealed against the above-mentioned decision. Despite of their opinion that the decision of UKE in favour of Netia SA is valid, the Management Board cannot assure that following court proceedings the above decision will not be amended or annulled.

NETIA GROUP
COMMENT ON THE FINANCIAL REPORT
FOR THE FIRST QUARTER OF 2009

(All amounts in thousands, except as otherwise stated)

Bitstream Access

TP SA has appealed against decisions issued by the President of the UKE to SOKIK:

- the decision that modified the contract between Netia and TP SA dated September 15, 2006 on the access to the local loop by access to nodes of telecommunications network for the sale of broadband data transmission ("BSA services"). In that decision, TP SA was obliged to change rules for calculating the termination fee in case of resignation of the service on a given subscriber line;
- the decision that modified rules for calculating remuneration for TP SA for the BSA services provided to Netia. Rules were modified by raising the bulk rebate for the special version of the service (i.e., provided on the basis of the periodic contract) from 41% to 51%;
- the decision amending the contract referred to above, in the scope of (i) lowering the fee for making the link available from PLN 81 to PLN 40,98 (not in thousands) (ii) the principles of forecasting and the settling of forecasts in relation to the installation fee, provided for in the decision, (iii) introduction of charge of PLN 40,98 (not in thousands) for resignation from the service - in exchange for the balancing fee Netia was previously obliged to pay in case subscriber terminates contract on the provision of broadband access with the usage of TP's links prior to the lapse of the term, for which the contract was concluded; (iv) other significant terms of using the BSA service by Netia.

Despite their opinion on the validity of UKE's decisions, the Management Board cannot assure that SOKIK will dismiss the appeals of TP SA and that it will not annul above decisions.

In April 2009 Netia motioned to the President of UKE for the issuance of the decision replacing the amendment of an agreement with respect to raise of the wholesale reduction, which has been determined in order to establish the level of subscription fees for broadband access to a level determined in the currently binding TP SA BSA frame offer, i.e. to the level of 51,75%. Despite the fact that Netia's motion is in accordance with the binding frame offer of TP SA, the Management Board cannot assure that the President of UKE will issue a decision on the amendment of the agreement with TP SA in accordance with the request provided for in the motion.

Risks related to the decisions of the President of UKE on the service of termination of calls in mobile networks (hereinafter referred to as "MTRs")

In January 2009 the President of UKE issued decisions amending agreements on the interconnection of networks between Netia and Polska Telefonia Cyfrowa Sp. z o.o., Netia and Polkomtel SA as well as Netia and PTK Centertel SA by lowering the mobile termination rates (MTRs) in public mobile telephone networks of the above-mentioned mobile networks operators.

The Management Board cannot assure that the above-mentioned decisions were not appealed against by the mobile operators and, if this happens, that the above-mentioned decisions will not be amended or reversed by Court.

Risks related to requests from TP SA to change the obligations with respect to telecommunications access

Interconnection

TP SA has requested from Netia renegotiation of fees for call termination in the fixed public telephone network of Netia. Despite the lack of legal obligation to follow the motion of TP SA, the Management Board may provide no assurance that the President of the UKE will not consider that Netia's fees should be aligned with the fees paid to TP SA.

In letters from October 2008 TP SA requested from Netia and Tele2, whose rights and obligations were assumed by Netia as a result of the merger of companies, effective as of 27 February 2009, renegotiation of fees for AUS services, provided within the framework of agreements regarding number portability as well as the fees for the use of collocation services, all set forth in the interconnection contracts between TP SA and Netia and Premium Internet respectively. Despite their opinion that the request of TP SA in the above motions are ungrounded, the Management Board cannot assure that in case TP SA applies to the President of the UKE for a decision in this matter, the regulator will not accept the above motions of TP SA and will change the terms of settlements between Netia and TP SA and Premium Internet SA and TP SA for the above services.

Wholesale network access service of TP SA (WLR)

In October 2008 TP SA informed Netia in writing about the interest of TP SA in the provision of "[...] services of wholesale network access offered by Netia SA". Unlike TP SA, Netia is not subject to obligations to provide telecommunications network access to other operators, so despite the vagueness of the TP SA's request, the Management Board is definitely of the opinion that there is no basis for such obligations. The Management Board cannot, however, assure that in case TP SA applies to UKE, the regulator will share the opinion of the Management Board that TP SA's request is without any basis.

With the motion dated October 2008 TP SA requested from Premium Internet, whose rights and obligations were assumed by Tele2 Polska as a result of the merger effective as of December 31, 2008 (and, subsequently, the above-mentioned rights and obligations were assumed by Netia on February 27, 2009), renegotiation of fees for using WLR services. The Management Board is of the opinion that TP SA's request is groundless. However, the Management Board cannot assure that the regulator will not accept the above motions of TP SA and change the terms of settlements with TP SA.

NETIA GROUP
COMMENT ON THE FINANCIAL REPORT
FOR THE FIRST QUARTER OF 2009

(All amounts in thousands, except as otherwise stated)

Bitstream Access

With motions dated October 2008 TP SA requested Netia to renegotiate fees for access to the local loop. The Management Board is of the opinion that the request of TP SA in the above motions are ungrounded, however, the Management Board cannot assure that in case TP SA applies to the President of the UKE for a decision in this matter, the regulator will not accept the above motions of TP SA and change the terms of settlements between Netia and TP SA and PI SA and TP SA for the above services.

In October 2008 TP SA informed Netia in writing about the interest of TP SA in the provision of "services of access to the local loop [...] offered by Netia SA". Unlike TP SA, Netia is not subject to obligations to provide telecommunications network access to other operators, so despite the vagueness of the TP SA's request, the Management Board is definitely of the opinion that there is no basis for such obligations. The Management Board cannot, however, assure that in case TP SA applies to UKE, the regulator will share the opinion of the Management Board that the TP SA's request is without any basis.

The Management Board cannot guarantee that new sources of dispute with TP SA will not emerge in the future and, if they do emerge, whether these will have a material impact on the business of the Netia Group.

Risks related to Tele2 Polska's business

As a consequence of the acquisition of shares in Tele2 Polska in September 2008, the Netia Group has assumed a significant part of financial risks related to its business.

Risks related to a threat to the stability of the decision on telecommunication access services

Interconnection

TP SA appealed against the Decision of the President of the UKE dated November 4, 2004, that specified conditions of the contract for interconnection between Tele2 Polska and TP SA dated December 19, 2002, with regard to long - distance and local connections. The Appellate Court reversed the decision of the Court for the Protection of Competition and Consumers ("SOKiK") that dismissed the appeal of TP SA and remanded it for a de novo hearing. In April 2009 SOKiK dismissed the appeal of TP SA.

TP SA appealed also against the Decision of the President of the UKE that specified conditions for the use of "Flat Rate" service by Tele2 Polska as well as the refusal to amend the above-mentioned decision. The Management Board cannot assure that the SOKiK will dismiss the appeals of TP SA.

Wholesale network access service of TP SA (WLR)

The President of the UKE issued a decision specifying conditions for the use by Tele2 Polska of the wholesale network access to TP SA on the conditions of the "reference offer of TP SA on the telecommunications access with regard to call initiation, call termination, and wholesale network access" approved by UKE in the decision dated April 8, 2008. TP SA appealed to SOKiK against that decision. Despite being of the opinion that the decision of UKE is valid, the Management Board cannot assure that the SOKiK will reverse the appeal of TP SA and that it will not annul that decision or will not stay the enforcement of it.

In August 2008 the President of UKE refused to change the WLR decision with respect to the fees. TP SA requested for a higher fee, emerging from the result of the calculation of costs.

TP SA appealed from the above-mentioned decision. Despite the fact that in the opinion of the Management Board the decision of the President of UKE issued for Netia was correct, the Management Board cannot assure that the above-mentioned decision will not be reversed or amended during court proceedings.

Bitstream Access

The President of the UKE issued decisions modifying the contract concluded between Tele2 Polska and TP SA on access to the local loop by way of accessing nodes of TP SA's telecommunications network for the purpose of sales of broadband data transmission services. Despite their opinion on the validity of these decisions, the Management Board cannot assure that following court proceedings the above decision will not be amended or annulled.

Risks related to the TP SA's requests to change its obligations with respect to telecommunications access

Wholesale network access service of TP SA (WLR)

TP SA appealed against the decision of the President of the UKE refusing the request made by TP SA to change the fees for WLR services provided to Tele2 Polska. The Management Board cannot assure that following court proceedings the decision of UKE will not be reversed or annulled.

Risks related to TP SA's claims for payment

TP SA filed against Tele 2 Polska

- a claim demanding the payment of PLN 59,091 as damages incurred by TP SA as a result of the performance of the decision of UKE specifying wholesale access to the TP's network (WLR). In the opinion of the Management Board, based on an external legal opinion, the TP SA claim for the payment of the said sum raised against Tele 2 Polska is groundless. The Management Board cannot, however, assure that the court will not uphold TP SA's claim in whole or in part.

NETIA GROUP
COMMENT ON THE FINANCIAL REPORT
FOR THE FIRST QUARTER OF 2009

(All amounts in thousands, except as otherwise stated)

- a claim demanding the payment of PLN 3,313 as a remuneration for the traffic terminated or originated in TP SA's network in the excess of the agreed on the basis of the usual wholesale rates and the flat rate (PSI) for the period from November 13, 2007 to January 4, 2008. In December 2008 the court issued the order to pay for the sum of PLN 3,313 Netia objected the order to pay, so the order turned invalid. The Management Board cannot, however, assure that the court will not award the TP SA's claim.

On February 27, 2009, as a result of the merger with Tele2 Polska Netia became a party to the above proceedings.

TP SA filed also against Tele 2 Polska a claim for the return of unjust enrichment in the sum of PLN 7,600 – profits of Tele2 Polska for the traffic on the basis of the interconnection contract for the period of March 2, 2007 to November 12, 2007, given the subsequent overturn of the order of the President of UKE correcting the decision on the flat rate (PSI). The claim was not yet served neither to Netia nor to Tele2 Polska.

The Management Board cannot assure that the court will not award TP SA's claim.

Apart from the above, in February and March 2008 TP SA sent to Tele2 Polska orders to pay the total sum of PLN 10,957 on the basis of improper, according to TP SA performance of the contract in relation to PSI.

Risks related to regular inspection procedures and the procedures regarding the practices infringing the collective consumer interest

In February 2009 the President of UKE issued the decision fining Tele2 Polska with the amount of PLN 500 for the exchange of traffic between Tele2 Polska and TP SA in breach of conditions of the so-called "flat interconnection rate". Tele2 Polska appealed against the above-mentioned decision, nevertheless the Management Board can not assure that the appeal will be allowed and the decision will be reserved.

In addition, UKE is examining Tele2 Polska's practices in implementing the subscribers' rights to retain his/her number when using the services of wholesale access to the network of TP SA.

The fines which may be imposed by the President of the UKE in the aforementioned proceedings (a party to which became, on February 27, 2009, Netia), cannot exceed 3% of the income gained in the preceding calendar year. Any fine imposed may be appealed against. The Management Board cannot assure that the President of the UKE will take under consideration explanations of Tele2 Polska (and, following the merger – Netia) and consider them sufficient for deciding that the case is without basis.

In December 2008 the President of the Office for the Protection of Competition and Consumers (UOKiK) issued a decision in which he stated that Tele 2 Polska had breached the collective consumer interest by charging a fee of PLN 100 (not in thousands) to its consumer clients for early termination of agreements concluded for a specified term. In the decision the President of UOKiK imposed on Tele 2 Polska a fine of PLN 3,978. With respect to the imposed fine, the decision of the President of UOKiK was not made immediately binding and enforceable. Tele2 Polska has appealed against the said decision. Due to the merger of Tele2 Polska and Netia, on February 27, 2009 Netia became a party to the above-mentioned proceedings conducted by SOKiK.

Despite the deep conviction of the legitimacy of the appeal charges, the Management Board can not ensure that the court will change the decision of President of UOKiK, and specifically, that the fine will be repealed or decreased.

Before SOKiK and the Appellate Court there are proceedings with regard to practices of Tele2 Polska infringing collective interests of consumers and for holding clauses of terms and conditions and price lists as abusive. Due to the merger of the Tele2 Polska and Netia, on February 27, 2009 Netia entered into the rights and obligations of a party to the above-mentioned proceedings.

The Management Board cannot assure that as a result of these procedures, the companies will not be obliged to amend their standard contracts or will not be subject to a fine from UOKiK in case the court finds a practice infringing collective interests of consumers.

The Appellate Court rendered a decision in which it held that the standard terms and conditions and price lists applied by Tele 2 Polska are abusive with respect to an obligation of a consumer subscriber to reimburse the operator for the costs of requests for payment and debt collection proceedings. The decision of the appellate court is final and binding. Therefore Tele 2 Polska is obliged to amend the standard contracts. The Management Board cannot assure that as a result of the aforementioned decision, the Netia Group will not incur further costs regarding possible private claims for reimbursement.

Other regulatory risks

The President of the UKE is regularly carrying out inspections of Netia's compliance with the provisions of the Telecommunications Law. To date, none of these inspections have ended with a monetary penalty.

The Management Board can not also assure that with regard to all inspection procedures UKE agrees that the position of Netia and the activities undertaken on its basis by the Netia Group are consistent with regulatory requirements and the law.

NETIA GROUP
COMMENT ON THE FINANCIAL REPORT
FOR THE FIRST QUARTER OF 2009

(All amounts in thousands, except as otherwise stated)

Risk of increased competition

The Netia Group's main competitors in the field of telephone services are TP SA and mobile network operators, and in some geographic areas also other operators providing wireline telephone services including some cable television networks. Within the market for corporate telephony services, the main competitors are numerous providers of various sizes, the most significant of which is TP SA. Poland has witnessed a considerable increase in competition, which may intensify even further, considering the lack of legal barriers in entering the market and the improving terms of regulated access to TP SA's network. Netia is unable to evaluate the extent to which new market participants will use the availability of their rights, particularly with regard to the significantly lower costs of entering the market than those incurred by the Netia Group. The Management is unable to evaluate the extent to which intensification of competition would adversely affect the Netia Group's activity.

Risk of competition from TP SA and TP SA's compliance with regulatory decisions

TP SA occupies a leading position among wireline telephone service operators in Poland. At the same time, it enjoys a stable position on the market for data transmission. Within the scope of wireline telephone services, the Netia Group encounters competition from TP SA in all the geographic areas in which it operates. TP SA is a much larger entity than the Netia Group and possesses a much wider backbone and access networks. It enjoys long-established relationships with many customers which the Netia Group considers its target customers, including many companies operating in areas where the Netia Group conducts its business activities. The infrastructure used by TP SA in these areas is comparable to the infrastructure of the Netia Group in terms of the technologies employed.

Moreover, TP SA still maintains a leading position among operators of domestic long-distance calls, which enables it to offer more flexible tariffs. It is difficult to predict what policies TP SA will pursue with regard to tariffs, the selection of target markets and arrangements concerning access to its infrastructure and interconnections as a reaction to the extension of the network by the Netia Group and more intense competition from the Netia Group in various areas of the country. However, the Management expects that TP SA will compete with the Netia Group on prices and for the most attractive customers. In the past, the Netia Group was forced to lower its prices in order to attract new customers and retain the current ones, and such measures may also be necessary in the future. The Management expects that TP SA will maintain a strong competitive position against the Netia Group in most geographic areas where the Netia Group provides telephone services, and will continue to compete with the Netia Group in other fields, including data transmission services and internet access. It is possible that aggressive competition from TP SA will materially and adversely affect the revenues of the Netia Group and the results of its operating activity.

TP SA owns most local loop access networks and has, in the past, offered other operators access to the network of these local loops on terms that, in many cases, render the addition of a customer to the network too expensive. However, during the course of 2006 a new telecommunications regulator has issued decisions creating unified offers in the area of regulatory access to the TP SA network which Netia currently considers to be commercially viable. As a result, in 2006 the Netia Group signed a new cooperation agreement with TP SA that allows Netia to offer Internet access to TP SA's customers using a regulated TP SA wholesale service known as bitstream access. In January 2007 President of UKE issued a decision changing an interconnect agreement between TP SA and Premium Internet SA., the Company's subsidiary (merged with Tele2 Polska in 2008, and then merged with Netia in February 2009), regarding wholesale line rental (WLR). This decision constituted the basis for a new type of access to TP SA's network, enabling the Netia Group to offer voice services to TP SA customers. Moreover, in April 2007 the Company concluded an agreement with TP SA on local loop unbundling. The Netia Group uses local loop unbundling in providing voice and data services and in the future intends to offer differentiated value added services such as IPTV. Whilst key commercial terms of these services, as set by the regulatory decisions, are currently commercially attractive, operational cooperation with TP SA in order to provide and maintain such services to end customers needs to be much more coordinated than has been the case in the past. The Management can give no assurance that TP SA will provide the required level of cooperation or that the regulator will respond by effectively enforcing TP SA's cooperation. Furthermore, we can give no assurance that market developments, future court judgments or future regulatory decisions may not render the current opportunities to reach customers via TP SA access networks no longer commercially viable.

TP SA may decide to build a new generation network

The most modern fixed line telephony networks being deployed around Europe by incumbent operators like TP SA utilize fiber to the curb (FTTC) or fiber to the home (FTTH) to significantly increase bandwidth and all IP networks that eliminate the traditional telephony switches and digital splitter (DSCAMs). Moreover, many incumbents are lobbying to receive relief from regulatory obligations for a period of time in order to improve their returns from such large investments. As described above under "Risks resulting from changes in the Telecommunications Law", changes to the Telecommunications Law to provide such relief from regulations to TP SA are currently being considered by the Minister of Infrastructure. Such new generation networks (NGNs), if deployed in Poland, could materially deteriorate the economic returns Netia plans to earn from regulatory access products such as bitstream, WLR and LLU. Management can give no assurance that TP SA will not finally choose to deploy such a NGN network and, if it does so, whether the regulator will ensure alternative network operators such as Netia enjoy fair access to such a network on acceptable economic terms.

NETIA GROUP
COMMENT ON THE FINANCIAL REPORT
FOR THE FIRST QUARTER OF 2009

(All amounts in thousands, except as otherwise stated)

Competition from other independent operators

According to the regulations in force before January 1, 2001, the Minister of Telecommunications granted licenses for the provision of local telecom services within a given geographic area (usually within a given numbering zone) to one private operator (apart from TP SA). Obtaining licenses usually entailed significant investments. Pursuant to the New Telecommunications Law, telecommunications activity may be pursued on the basis of an entry in the Register of Telecommunications Providers kept by the President of the UKE. Therefore, the Netia Group expects the number of operators active in the areas in which it conducts its activities to increase. In 2003 there was a swap of license fee liabilities of the then-operating subsidiaries of the Netia Group, and in the case of the fees which El-Net (a company acquired in 2004) was required to pay, the swap for capital expenditures took place in 2006. However, the license fees installments paid prior to the change in the Telecommunications Law have not been repaid to Netia. Operators who have not paid license fees and, therefore, do not need to recover the costs of such license fees, hold a competitive advantage.

In some areas in which the Netia Group operates, there are large institutions with their own internal telecommunications networks (where the users of the telecom services of such institutions include, additionally, the inhabitants of the given area), which reduces the potential revenues that the Netia Group could generate in these areas, and such operators may be a potential source of competition in the future.

Competition from cellular mobile telephone operators

In recent years, services offered by cellular telephone operators have negatively affected wire line telephone operators. This stems largely from mobile substitution, where subscribers choose to make telephone calls using their mobile phones in preference over fixed telephones, resulting either in less traffic or disconnections for fixed line operators. Mobile substitution becomes more pronounced as mobile tariffs decline, as they have in recent years, converging with traditionally lower cost fixed line tariffs. Similar substitution effects may also apply to broadband services, given the increased take-up of mobile broadband services offered by mobile operators.

To help mitigate the losses to mobile operators, Netia has begun to offer convergent products via a wholesale mobile service provider agreement to take mobile services from P4 that Netia may then resell under the Netia brand to Netia customers.

During the first half of 2008, certain Polish mobile operators have begun to market fixed internet access services via the fixed access network of TP SA, on the basis of regulated bitstream access decisions. This represents a significant new source of competition for market share in the fixed broadband market.

Other sources of competition

Over the last several years, competition for voice and Internet services has increased from cable television operators. Triple play bundles (voice telephony, Internet access and cable television) have proven to be particularly challenging, however, Netia is reviewing alternatives to combat this threat. Specifically, IPTV offers fixed line telephone operators the ability to compete directly with cable television operators. The importance of IPTV and related services (such as video on demand) is being analyzed in the context of Netia's strategy to expand its share of the broadband market. In particular, the Company is considering the launch of an IPTV offering taking content from the "n" satellite TV platform. A letter of intent has been signed and tests are ongoing, but we can provide no assurance that this innovative partnering approach will be successful or that returns on investment will be acceptable.

Market consolidation

Market consolidation through acquisitions remains an effective way for fixed line operators to strengthen their market position by utilizing the effects of scale. In the past Netia has successfully acquired several telecommunications operators making it the market leader for consolidation.

Whilst acquisitions of large scale telecommunications businesses are not crucial to the Company's strategy Netia continues to closely monitor the situation of all its main altnet competitors and may choose to try to acquire one or more of these competitors in the future if the opportunity arises. Some acquisitions may consume a considerable portion of Netia's financial reserves and no assurance can be given that expected synergies from such acquisitions will be reached as planned.

Strategic importance of P4 to Netia's future development

The successful development of P4 into an important player on the Polish mobile market, having significant market share and being able to self-finance its continued development is in turn important for Netia with respect to being able to achieve its own development plans. The successful and profitable implementation of the Transmission Agreement with P4, under which Netia is providing substantially all the transmission services for the initial roll-out of P4's UMTS network depends on P4's long term ability to build out its network and meet its obligations to Netia. The carrying value in Netia's accounts of the transmission network built by Netia for P4 to lease is dependent on P4's financial situation, P4 Management's willingness to continue using Netia's services and any mobile market consolidation that might include P4. On March 3, 2009 Netia signed a non-binding term sheet with P4 to modify the Transmission Agreement. If converted into a binding contract, the term sheet foresees P4 obtaining the option to buy the transmission network from Netia in exchange for extending the notice periods in the Transmission Agreement, thereby reducing Netia's exposure to P4's financial situation and business prospects. However Management can give no assurance that a contract amendment will be signed on the same terms as those in the term sheet or at all.

The Management can provide no assurance that P4 will develop in accordance with its current business plans and, should P4 underperform those plans, this may have a material financial impact upon the results and cash flows of Netia from its commercial agreements with P4 and may also limit Netia's opportunities to grow its own fixed line and mobile service provider activities. No assurance can be given that Netia can find an alternative supplier of wholesale mobile services on acceptable financial terms or at all if P4 ceases to operate or is sold to another owner.

NETIA GROUP
COMMENT ON THE FINANCIAL REPORT
FOR THE FIRST QUARTER OF 2009

(All amounts in thousands, except as otherwise stated)

Cost reduction project

On April 6, 2009 Netia announced the implementation of project "Profit", a comprehensive operating cost reduction project aimed at cutting PLN 100 million from ongoing operating expenses on an annual basis starting from 2010. Whilst the project has been planned in detail with assistance from experienced international management consultants, Management can give no assurance that all planned initiatives will be successfully implemented or that the savings from the implemented projects will be in line with original expectations. Moreover, cost-reduction activities may generate unforeseen costs elsewhere in the organization or may need to be cancelled or reversed due to unexpected adverse impacts on quality or customer satisfaction. Accordingly, Management can give no assurance that the "Profit" project will deliver results in line with the announced plans.

WiMAX license requirements

On October 27, 2005 Netia WiMax S.A. (merged with Netia in 2006) and Netia WiMax II S.A. (merged with Netia in 2008) received the reservations of the 3.6-3.8 GHz frequencies, which are to be used to provide telecommunication services based on the WiMAX technology. The terms of licenses issued to the Company's former subsidiaries require them to meet annual connected capacity milestones in the future, as measured at the end of each year, subject to demand in the territory and population of Poland. Considering changes in the telecommunications market and, in particular, the advent of regulated access to the fixed line network of the incumbent fixed line operator, TP SA, the Company submitted applications to change future territorial and population coverage commitments for WiMax and on October 31, 2007 the Polish regulator issued a decision reducing the initial milestones. The amended milestones allotted for the year 2008 regarding population coverage were exceeded whilst there was a marginal underperformance of the territorial coverage requirements. In the event that license obligations are not met by an operator, the UKE has the power to confiscate the relevant license, if the issue is not rectified. However, historically such measures have rarely been used.

Tax regulations and their interpretation

Regulations relating to value-added tax, corporate income tax, and payroll (social) taxes have radically changed in comparison to the tax regulations, which existed prior to the economic and political transformation in Poland. The lack of reference to well-established practices and the relatively short period in which these new tax regulations have been in place often results in a lack of clarity and consistency in the regulations. Frequent contradictions in legal interpretations both within government bodies and between companies and government bodies create uncertainties and conflicts. Tax settlements, together with other areas of legal compliance are subject to review and investigation by a number of authorities, which are entitled to impose severe fines, penalties and interest charges. These facts create tax risks in Poland that are substantially more significant than those typically found in countries with more developed tax systems. The tax authorities may at any time inspect the books and records of the Company and may impose additional tax assessments with penalty interest and penalties within 5 years from the end of the year when a tax is due.

As a result of a tax inspection conducted in 2008 with the objective of reviewing the accuracy of settlement of the corporate income tax liabilities from 2003, the Company received a post-inspection protocol in which the tax authorities claimed that the Company understated the taxable income generated thereby and its corresponding tax liability for the period subject to the review. The Company commissioned a tax opinion in which the accuracy of the legal basis given by the tax office for the increased liability was negated. Based on this opinion and the its own analysis of the circumstances, the Company's Management Board believes that the conclusions of the protocol are unfounded and unjustified. In the opinion of the Management Board the Company has no material overdue tax liabilities in connection with the issues covered by the protocol and it will take all the legal action necessary to negate the conclusions drawn in that protocol. As at the date of these financial statements the Tax Authorities are still assessing Netia's position in regard to the matters raised and no adverse tax decision has been issued. Other than the said protocol, Management is not aware of any other circumstances, that would indicate any threat of material tax liabilities.

7. Transactions with related parties

A detailed list of transactions with related parties has been presented in the interim condensed consolidated financial statements of the Netia Group (Note 11) and interim condensed financial statements of Netia (Note 12).

8. Revised guidance for 2009 and medium-term outlook for 2010-2012 (not in thousands)

On April 6, 2009 the Management Board of the Company raised its guidance for Adjusted EBITDA (excluding one-off restructuring cost) for the 2009 financial year from PLN 260 million to PLN 290 million. This update in the earnings outlook follows further strong progress on Company's profitability in the first quarter.

Following extensive preparatory work over the past two quarters, the Management has now begun implementation of a comprehensive cost reduction project with the objective of eliminating PLN 100 million of operating expenses from the cost base for the 2010 financial year. One-off costs of reorganization associated with this project during 2009 are expected to total up to PLN 25 million. Accordingly, EBITDA for 2009, net of reorganization expenses, is forecasted at PLN 265 million.

NETIA GROUP
COMMENT ON THE FINANCIAL REPORT
FOR THE FIRST QUARTER OF 2009

(All amounts in thousands, except as otherwise stated)

The following table presents the Company's current estimates of all elements of the 2009 guidance in comparison to the guidance published previously on February 10, 2009:

2009 Guidance	previous	revised
Number of broadband service clients <i>(excl. Ethernet acquisitions)</i>	> 525,000	> 525,000
Number of voice service clients (own network and WLR)	> 1,150,000	> 1,150,000
Unbundled local loop (LLU) nodes	300	300
Revenues (PLN m)	> 1,520	> 1,520
Adjusted EBITDA (PLN m) (excl. restructuring cost of PLN 25 m)	260	290
EBITDA (PLN m) (incl. restructuring cost of PLN 25 m)	260	265
Investment outlays (excl. M&A) (PLN m)	260	260

Subscriber guidance does not include potential Ethernet network acquisitions, which remain important to Netia's strategy, but are difficult to forecast in terms of timing and scale.

The implementation of a cost saving project during 2009 had been factored into earlier medium term guidance. However, the project under implementation is more ambitious than provisionally planned by approximately PLN 40 million on an annualized basis. As a result, Netia is raising its medium term EBITDA margin guidance for 2010 and 2012 by 3 percentage points to 23% and 28%, respectively.

The following table presents the Company's current estimates of all elements of the medium term outlook for Netia Group in comparison to the guidance published previously (on February 10, 2009):

Medium-term outlook	previous	revised
Revenue growth (CAGR)	5% - 10%	5% - 10%
EBITDA margins in 2010 (%)	20%	23%
EBITDA margins in 2012 (%)	25%	28%
Net profit by	2010	2010
Free cash flow positive by	2010	2010
Capex to sales down to 15% by	2011	2011
1 million broadband subscribers	2012	2012

Netia will continue to monitor the possibilities of achieving the forecast results on a quarterly basis. The achievement of the forecast results will be assessed, and any necessary adjustments introduced, after the end of a given quarter of the financial year based on an analysis of sales revenues, investment expenditure and the number of broadband clients and any other factors it may consider relevant.

9. Loans, warranties and collaterals

Bank loan

On May 15, 2007 the Company entered into a PLN 300,000 credit facility agreement (the "Facility"), which was further amended on June 27, 2008 and on December 4, 2008 with Rabobank Polska SA (as the arranger), Bank Millennium S.A., Bank Gospodarki Żywnościowej S.A. and Raiffeisen Bank Polska S.A.

Currently, the Facility amounts to PLN 375,000 and is to be repaid by June 30, 2013. The Facility bears interest at a variable interest rate of WIBOR plus a margin dependent on financial ratios and the Company must pay a commitment fee on the undrawn, uncanceled amount of the Facility commitment. The proceeds from the Facility can be used to finance the Netia Group's capital expenditures, its general corporate purposes and the acquisition of companies whose business activities are substantially similar to the business activities of the Group.

The cumulative draw downs under this Facility made in previous years amounted to PLN 205,000 and were repaid in full.

The repayment of the Facility is secured by the following: capped mortgages on the right of perpetual usufruct of the Company's real estate at ul. Poleczki 13 in Warsaw; registered pledges on: (i) a set of movables and property rights acquired by Netia as a result of its merger with Świat Internet S.A., (ii) a collection of Netia's movables and property rights, (iii) shares in UNI-Net Sp. z o.o. and Interneta, and (iv) the shares and general partner's rights in Netia Spółka Akcyjna UMTS s.k.a.; and assignment as collateral security of Netia's receivables under certain agreements. Moreover, the Company's subsidiaries (InterNetia, UNI-Net Sp. z o.o., Netia Spółka Akcyjna UMTS s.k.a.) jointly, severally, irrevocably and unconditionally guaranteed punctual performance by the Company of all its obligations under the Facility up to the maximum amount of PLN 468,750.

NETIA GROUP
COMMENT ON THE FINANCIAL REPORT
FOR THE FIRST QUARTER OF 2009

(All amounts in thousands, except as otherwise stated)

Bonds

On the basis of the resolution of the Management Board and of the foreign currency permit dated 11 September 2008 Netia S.A. issued 1 (not in thousands) unsecured registered bond AA series, in the nominal value of PLN 94,500 and 1 (not in thousands) unsecured registered bond BB series, in the nominal value of EUR 40,340 with the repurchase date falling on 12 September 2010 and with a right of Netia S.A. for an earlier repurchase.

The above bonds were offered on 11 September 2008 to the Company's subsidiary, Netia Spółka Akcyjna UMTS Spółka komandytowo-akcyjna for the issue price equal to the nominal value of each of the bonds,

Netia S.A. issued the bonds to ensure that it utilizes the group's cash deposits for the acquisition of Tele2 Polska and implementation of its ongoing growth strategy prior to beginning to draw down on available credit lines.

In addition on September 30, 2008 Tele2 Polska purchased from Netia 1 (not in thousand) unsecured registered bond, CC series, in the nominal value of PLN 20,000. The Company's liability under this bond was eliminated due to merger of Netia and Tele2 Polska in February 2009.

10. Other information

Cost saving initiatives (not in thousands)

Following the acquisition of Tele2 Polska in September 2008, which significantly augmented the scale of the business, Netia performed a comprehensive cost review across all functional areas of the Company. Areas for operating cost optimisation were identified, with a target to reduce full year operating expenses for 2010 and onwards by PLN 100.0m. It is expected that the savings generated under this program in 2009 will amount to approximately PLN 20.0m. Already underway, the program includes reduction of Netia's headcount, review of control and reporting processes, increase of work effectiveness, span of control reduction and contract renegotiations. One-off reorganization costs of up to PLN 25.0m associated with this project are expected to be recorded during FY 2009. The first PLN 1.6m was recorded in Q1 2009.
